# Our Business Strategy Going Forward
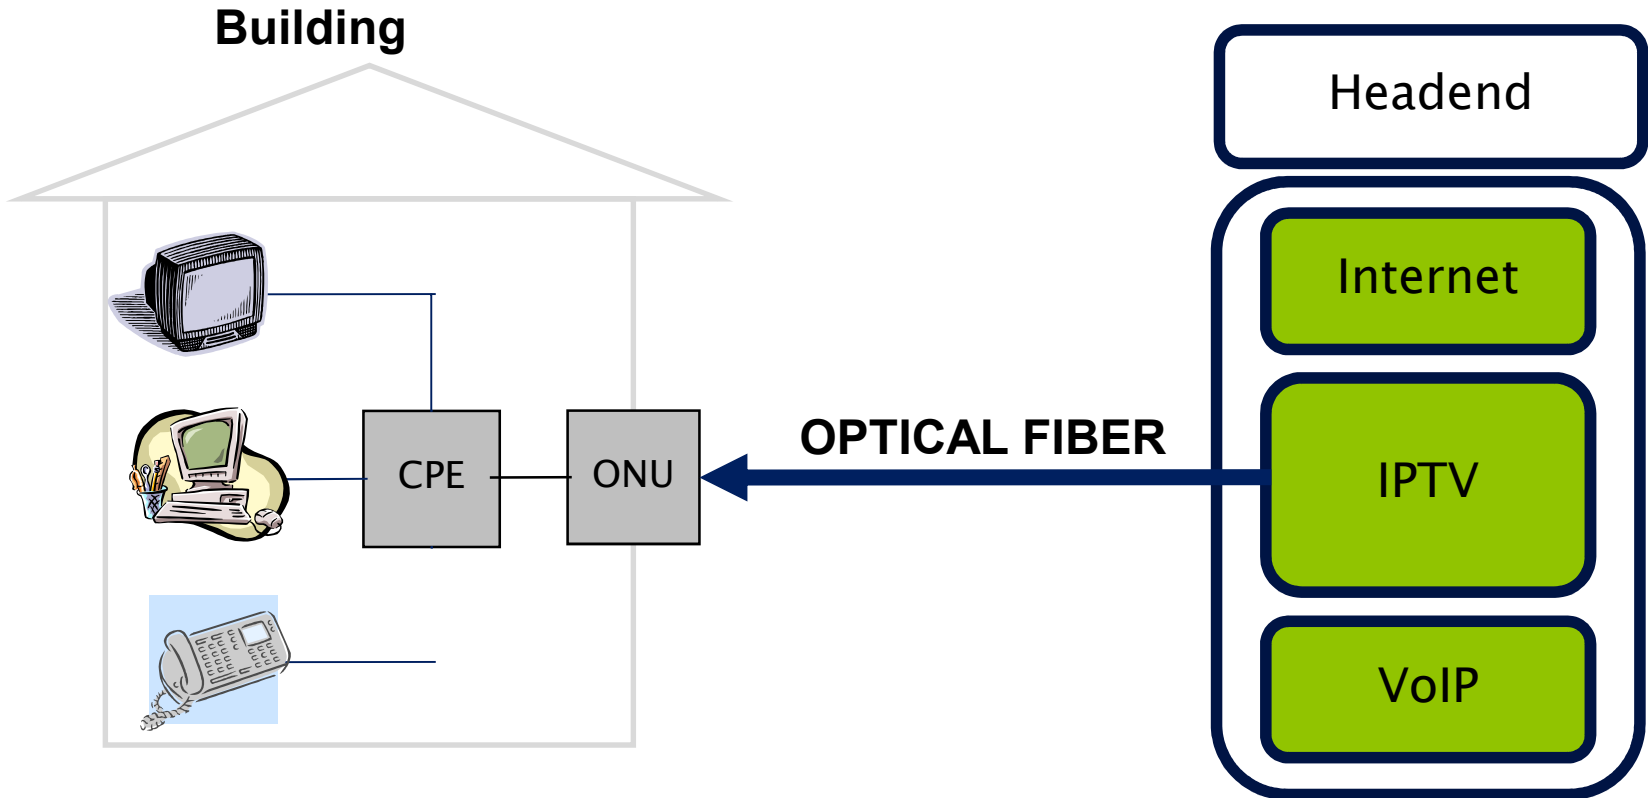

▸  Colba.Net has put together a business strategy to approach companies who  manage multi-dwelling residential properties or new construction and co-properties and business located in buildings near our fibre route.

▸  We have already deployed fibre in business buildings and multi-dwellings – see the list below.

▸  We have deployed over 20.5KM of fibre and our objective is to deploy 31.5KM  of our own fiber on the Island and where ever there is a business case.

ColbaNet

# Our Business Strategy Going Forward

- The business strategy is to deploy fiber in the Business Buildings, Multi-dwelling (New or existing) and Co-properties on the fibre route in  order to offer our services the Triple Play (Internet,Telephony and IPTV).

- A side from deploying our own fiber Colba.Net is co-located in nine (9) Bell Canada Central Offices and offers the service directly through our ADSL2+ which makes Colba.Net unique as compared to other companies of our  size.

- Our Fibre Service offers true speeds and price per quality and  very competitive packages.
